

TOP FACILITIES EQUIPMENT

COMMITTED TO SUSTAINABILITY

ECO PODS

Introducing our new Eco Pods, a sustainable solution for reducing waste and promoting recycling on set. Designed to separate waste into compartments, these pods help streamline recycling efforts.

Our team ensures proper disposal of waste and recyclables, reducing your carbon footprint and supporting eco-friendly practices.

Contact us today to learn more about how our Eco Pods can benefit your production.

BATTERY FLOOD LIGHTS

LED battery flood lights are the perfect choice for film sets, combining power and practicality with sustainability. Designed to run on efficient battery technology, they eliminate the need for noisy generators and reduce emissions, making them an eco-friendly solution.

Compact and reliable, they provide bright, even illumination ideal for setting up and lighting a production base, while their long battery life ensures consistent performance throughout the shoot. Rugged yet portable, these lights are built to keep your set running smoothly, wherever you're working

COMMITTED TO SUSTAINABILITY

BATTERY GENERATOR

At Top Facilities, we're proud to champion sustainable filmmaking by offering state-of-the-art battery generators, designed with Albert-certified productions in mind. These clean, eco-friendly power solutions provide reliable energy on set without the noise, fumes, or emissions of traditional generators.

Perfect for remote locations or running essential equipment, our battery generators deliver quiet, efficient, and carbon-conscious power that helps reduce your production's footprint.

By choosing Top Facilities, you're not just keeping your project on schedule — you're actively supporting industry-wide efforts to create a greener future for film and television.

MARQUEES

We now offer a wide range of marquees, from large structures ideal for catering and crew areas to smaller setups perfect for props and storage.

Our heavy-duty marquees are designed to withstand the demands of busy production environments and can be included as part of your full facilities package.

By bringing everything under one roof, we help streamline operations on set, improving efficiency while also keeping budgets under control.

TRACK WAY

We're excited to introduce our new trackway solutions, the perfect addition to our all-in-one facilities packages. Designed to keep everything in-house, our range includes heavy-duty ground protection, trackway mats, robust aluminium trackway, and versatile ground protection mats. Whether you're managing vehicle access, protecting sensitive terrain, or creating stable walkways, our trackways provide safe, durable, and cost-effective solutions that keep your production moving smoothly

TECH TRUCKS

Introducing our new EVTech Trucks — a pioneering step forward in sustainable film production. Purpose-built for the industry, these vehicles integrate advanced electric power supplies to deliver on-board charging for filming equipment, reducing reliance on traditional fuel sources.

Innovative, efficient, and environmentally conscious, our EVTech Trucks actively help lower the carbon footprint of your production while still providing the reliable power and full functionality you'd expect from a complete facilities package.

With this venture, we're proud to unite practicality and progress, making it easier than ever to achieve greener, more sustainable productions.

Sustainable Practices in Film and TV Production

At Top Facilities we are dedicated to promoting sustainability within the film and television industry. Recognising the sector's environmental impact, we collaborate closely with production companies to implement eco-friendly solutions that reduce carbon emissions and resource consumption.
